

Alpha/Beta

Professional Use Only

Properties: A very effective peel uses the perfect blend of acids to exfoliate with harshness, irritation or inflammation. A new technology in peeling, clients experience little to no stinging and should not experience flaking or peeling.

Important: A full client consultation is necessary before treatment. Have client fill out and sign consent form. Verbally repeat contraindication before proceeding with peel.

Indications

- Tolerated by most skin types

Contraindications

- Any allergy to aspirin (salicylates). Also, refer to contraindications for DermaFrost & Lactic

NOTE: Unlike DermaFrost which is self-neutralizing, the Alpha-Beta Peel will remain active until neutralized and removed.

Presentation:

30% Lactic Acid with 10% Salicylic Acid

40% Lactic Acid with 15% Salicylic Acid
