

## Lactic Acid

Professional Use Only

**Skin Type:** Aging, acne, keratinized

**Properties:** Lactic acid is a member of the Alpha Hydroxy group of molecules that promote desquamation of the stratum corneum.

### Contraindications

- Hypersensitivity or anyone "highly allergic"
- Severely dry and dehydrated skin or those with a compromised lipid barrier
- Accutane® with the past year
- Pregnancy or nursing
- Glycolic acid or salicylic acid within past week
- Retin-A® or Renova® within the past week
- Herpetic breakout
- Open wounds or suspicious lesions

**Important:** a full client consultation is necessary before treatment. Have client fill out and sign consent form. Verbally repeat contraindications before proceeding with peel
